# CHRONOS WORKFLOW PLATFORM

**CWP automates and streamlines business processes into a trackable, reportable web-based system.**

An outstanding collaboration framework to automate paper-based workflows into a unique collaboration framework without the involvement of programming or any special tool. It helps facilitate processes by providing the users with a list of their tasks and also highlighting those need immediate attention based on configurable measures. Managers can have an overall view of the tasks for the employees in their department. Executives will be able to see overall statistic and performance reporting metrics showing the successes and failures in the process flow using Chronos Workflow Platform, therefore ultimately helping the corporate decision making. Ready to use, **off-the-shelf** IT product, therefore it is a low-cost solution that allows **visually designing, modifying, managing, automating, reporting and tracing** business processes without IT development involvement.
